ABOUT

Full-stack product engineer building web and mobile software since 2019. I work across frontend systems, mobile apps, backend services, real-time infrastructure, AI automation, third-party integrations, DevOps, and application security. I care about fast products, clear interactions, and code that can survive after launch. Currently open to select remote opportunities and ambitious early-stage builds.

EXPERIENCE

Fullstack Developer

2026 — Present

≈ 7 mos · Remote

Shopant (shopant.io) ↗

- Built an end-to-end AI shopping assistant platform for Shopify stores from the ground up.
- Developed responsive frontend interfaces with React and Next.js, with a strong focus on performance optimization and user experience.
- Designed and implemented backend architecture using Node.js, Express, and PostgreSQL for scalable data management.
- Integrated AI-powered product recommendations and checkout guidance features that increased conversion rates by 20–35%.
- Implemented RESTful APIs for seamless communication between frontend and backend services.
- Reduced cart abandonment by 40–55% through instant question answering and guided checkout flows.

Fullstack Developer

2025

≈ 12 mos · Remote

BizConnect24 (bizconnect24.com) ↗

- Led frontend development and web performance optimization initiatives.
- Debugged and resolved UI issues to enhance user experience.
- Served as an AI subject matter expert, developing innovative features including AI-powered virtual try-on functionality.

Mobile Engineer

2024

≈ 12 mos · Remote

Get MUVN (getmuvn.app) ↗

- Built and maintained a React Native app (iOS/Android) with fast, reusable UI components and Context API state management.
- Integrated APIs and services including authentication, push notifications, offline support, and secure data sync.
- Implemented CI/CD pipelines using Fastlane and Bitrise for automated deployment.
- Optimized app performance and ensured cross-platform compatibility.

Fullstack Developer

2023 — 2024

≈ 24 mos · Remote

Zerouxstudio

- Designed and maintained application architecture with focus on performance optimization, security best practices, and scalability.
- Integrated third-party APIs and services to enable seamless data flow and enhanced platform functionality.
- Implemented modern development workflows including CI/CD pipelines, automated testing, and Git-based version control.
- Built and tested automation services for customized user workflows, increasing operational efficiency and system reliability.

Frontend Engineer

2021 — 2023

≈ 36 mos · Remote

FreexiT Technologies

- Collaborated with a 5-person team to integrate and manage third-party APIs, plugins, and external services.
- Delivered projects in fast-paced environments while maintaining quality standards and meeting tight deadlines.
- Leveraged modern full-stack technologies across frontend and backend to build robust applications.

Frontend Engineer

2019 — 2020

≈ 24 mos · Remote

Think Bloom Tech

- Developed and implemented scalable user interfaces and experiences, ensuring high performance and responsiveness.
- Collaborated closely with designers and backend engineers to translate design mockups and wireframes into functional front-end code.
- Ensured timely delivery of deliverables and completion of tasks, contributing to the overall project management and scheduling.

SELECTED PROJECTS

Shopant

LIVE ↗

An AI shopping assistant for Shopify stores that helps customers discover products, get instant answers, and move through checkout with confidence.

AI SHOPPING ASSISTANT

Bllaze

LIVE ↗

Bllaze turns raw ideas into execution instantly, generating PRDs, features, timelines, coding prompts, and launch assets in seconds.

Transform daily routines into lasting habits with AI-powered insights, emotional intelligence, and personalized guidance that keeps you locked in.

HABIT TRACKING • SELF GROWTH

Ventt.io is an app used for pairing two strangers to talk about thier challenges, built with Qwickkjs by yours truly.

MENTAL HEALTH • COMPANIONSHIP

SKILLS

LANGUAGES

- JavaScript
- TypeScript
- PHP
- Bash

FRONTEND

- React
- Vite
- Tailwind CSS
- Framer Motion
- React Query
- React Router

MOBILE

- React Native
- Expo
- Push / FCM
- OAuth 2.0

BACKEND

- Node.js
- Express
- REST APIs
- Socket.IO
- RabbitMQ
- JWT Auth

DATABASES

- MongoDB
- PostgreSQL
- MySQL
- Redis
- Prisma

AI & AUTOMATION

- OpenAI API
- LangChain
- AI Agents
- MCP Servers
- Puppeteer

INTEGRATIONS

- WhatsApp API
- Instagram Graph
- TikTok API
- Twitter / X API
- Facebook API
- Telegram API
- Stripe

INFRA & DEVOPS

- Docker
- Kubernetes (k3s)
- MinIO / S3
- Cloudflare
- Git / GitHub
- Linux

SECURITY

Penetration Testing

Exploit / PoC Dev
